

Technical Data Sheet

GALVANIZED DRUMS

OCTOBER 2025

Description

The metal packaging, known as galvanized drums, are made of galvanized sheets, for later use in the packaging of rosin and its derivatives. Through this packaging, the product's shelf life is promoted as well as its specifications and quality.

Composition

These drums are built using only galvanized sheets, which are in compliance with EN 10346 Galvanized.

Material Thickness

Top: 0.40 mm | **Bottom:** 0.40 mm | **Body:** 0.40mm

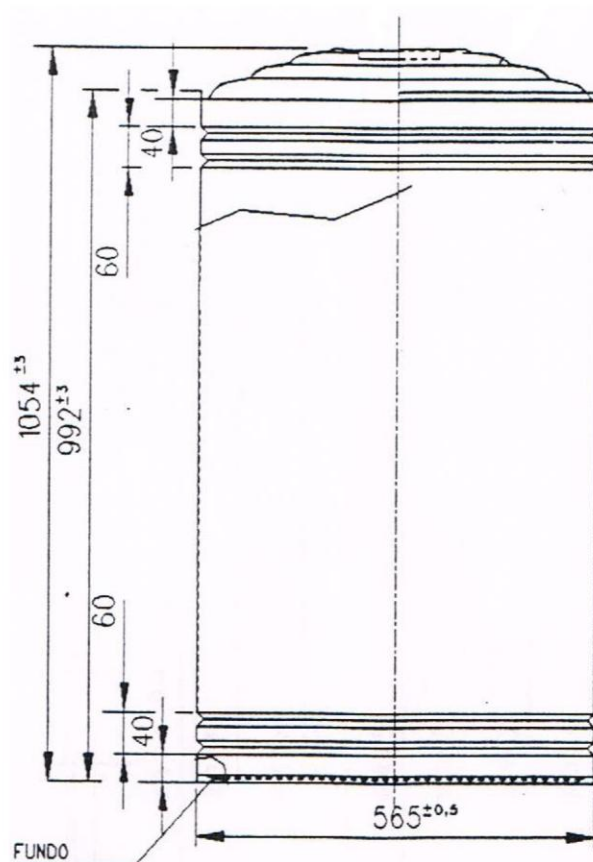

Dimensions Available

915x570 mm - Product capacity: 225 kg
1000x570 mm - Product capacity : 245 kg
1035x570 mm - Product capacity: 250 kg

Weight

8 kg

Technical Specifications

Applications

Packaging of rosin and its derivatives, giving the bloc form to the finished product.
